

# Color correcting an Image

Step 1 open an image that needs to be color corrected. (you need to be in the Expert Mode in some version of Photoshop elements)

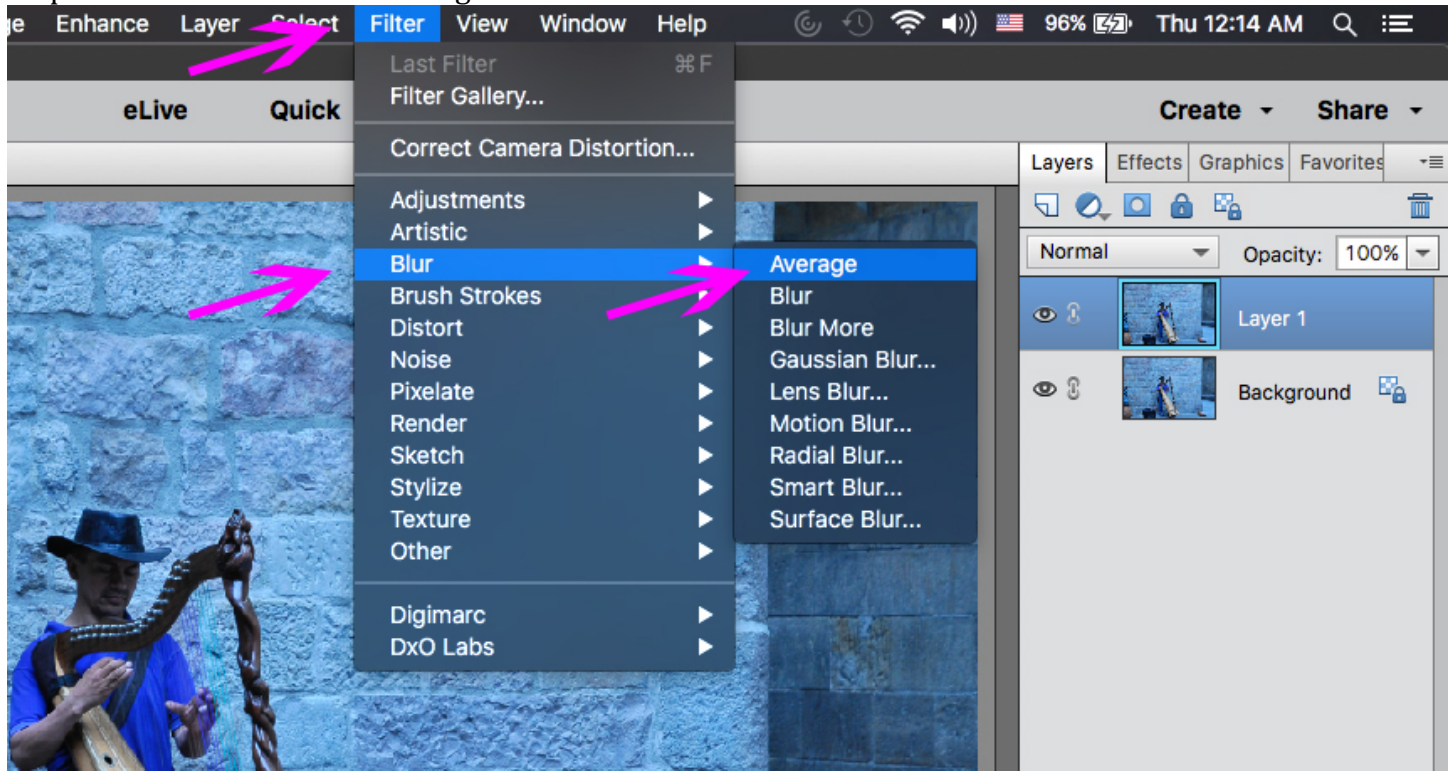

Step 2 duplicate the Layer (ctrl/cmd+j) or go to layer > duplicate Layer click OK

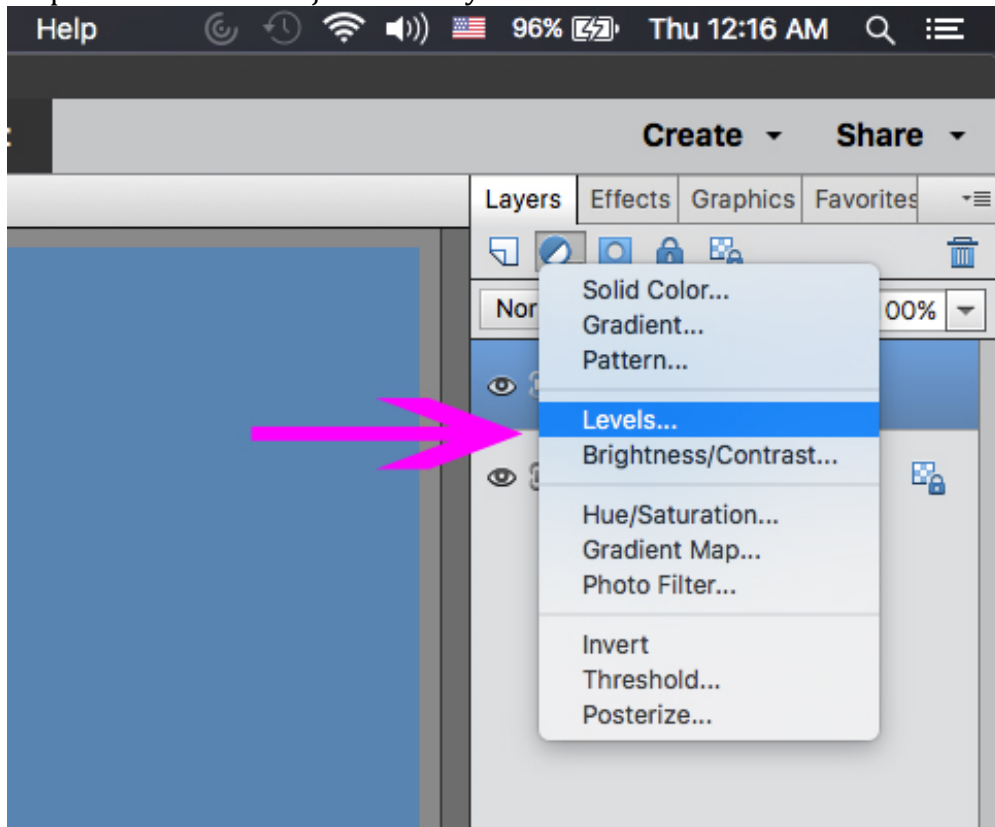

# Color correcting an Image

Step 3 Go to Filter .>Blur > Average

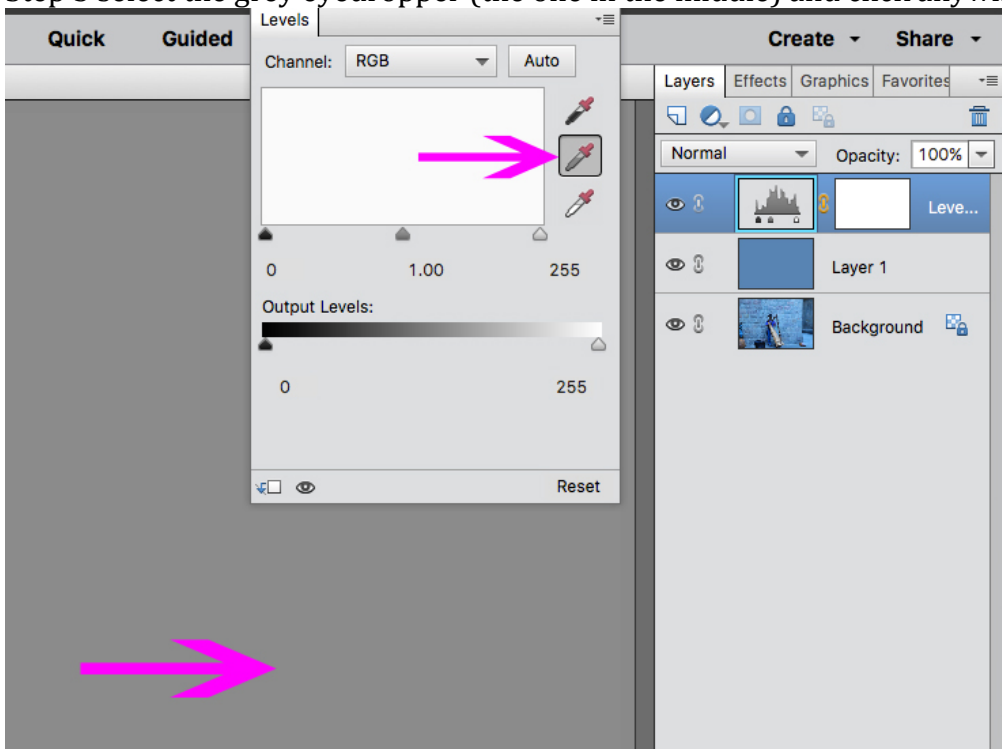

Step 4 Add a Levels adjustment layer

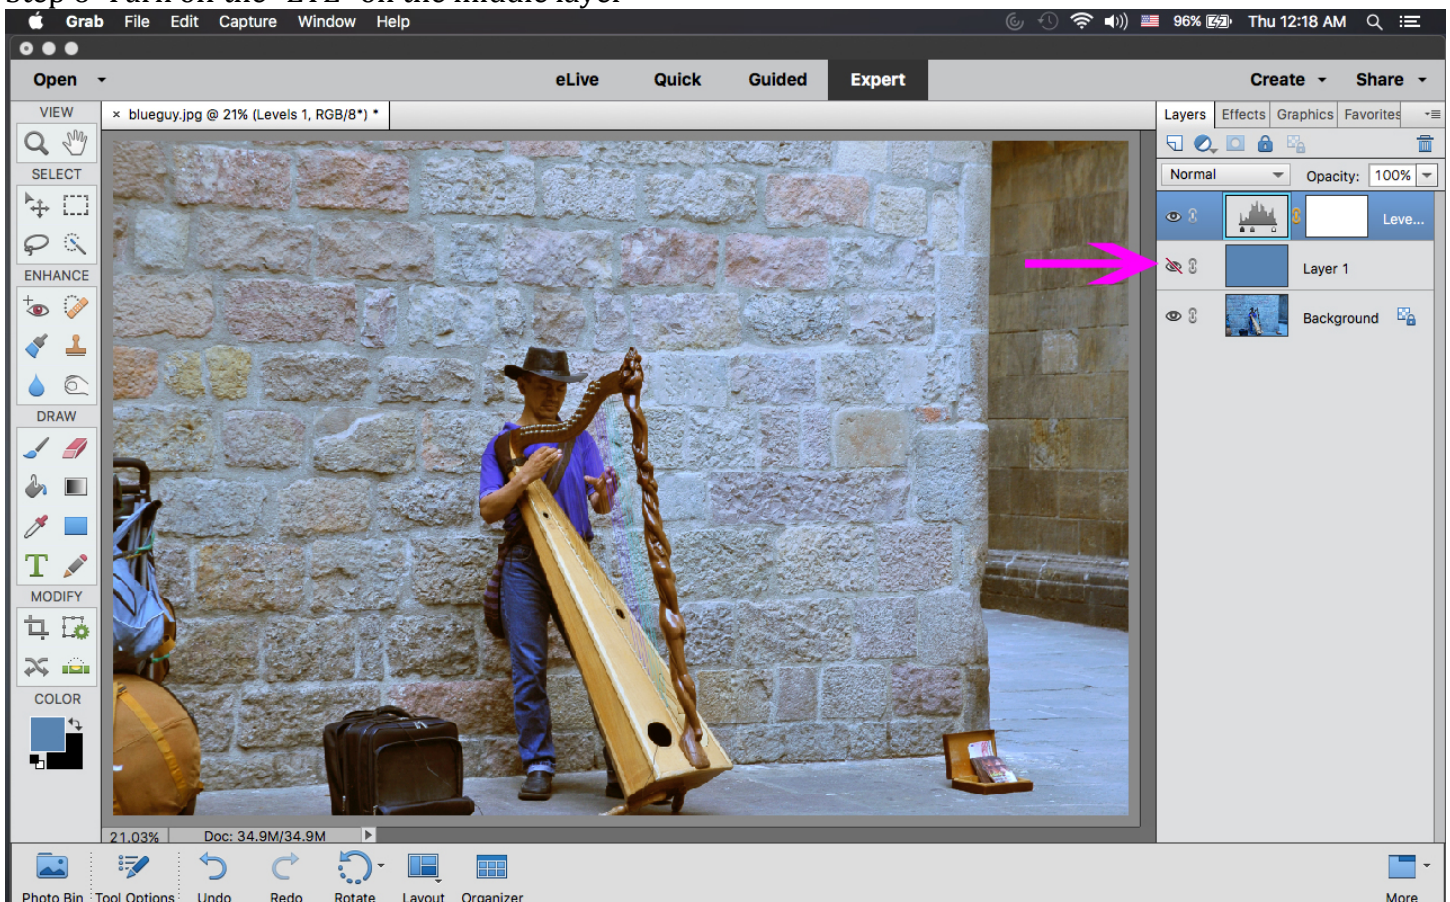

# Color correcting an Image

Step 5 select the grey eyedropper (the one in the middle) and click anywhere on your image.

Step 6 Turn off the "EYE" on the middle layer

Step 7 "Save As" your corrected image.
